# **Recommendations for People with COVID-19**

Have you tested positive for COVID-19 or have mild symptoms and are waiting for test results?

### Here's What To Do:

## Day 6: Do a self-check. How are you feeling?

You could have loss of taste or smell for weeks or months after you feel better. These symptoms should not delay the end of isolation.

ELF CHEC

To keep others safe in your home, wear a mask, stay in a separate room and use a separate bathroom if you can.

Do not travel for 10 days.

If you can't wear a mask, stay home and away from other people for **10 days**.

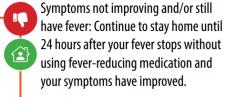

To calculate the recommended time frames, **day 0** is the day you were tested if you don't have symptoms, or the date your symptoms started.

Contact your healthcare provider to discuss your test results and available treatment options. Watch for symptoms, especially fever. If you have an emergency warning sign, such as trouble breathing or persistent chest pain or pressure, seek emergency medical care immediately.

No symptoms or symptoms improving.
No fever without fever-reducing
medication for 24 hours: You can leave
isolation. Keep wearing a mask around
other people at home and in public for
5 more days (days 6-10).

After you feel completely better, keep wearing a mask around other people at home and in public through **day 10**.

\*If you are <u>moderately or severely ill</u> (including being hospitalized or requiring intensive care or ventilation support) or <u>immunocompromised</u>, please talk to your healthcare provider about when you can <u>end isolation</u>. Please refer to <u>COVID-19 Quarantine and Isolation</u> for guidance on isolation in healthcare settings and high risk congregate settings (such as correctional and detention facilities, homeless shelters, or cruise ships).

## **Recommendations for COVID-19 Close Contacts**

Have you been in close contact with someone who has COVID-19? You were a close contact if you were less than 6 feet away from someone with COVID-19 for a total of 15 minutes or more over a 24-hour period (excluding K-12 settings).

#### Here's What To Do:

#### **Protect Others**

Take these steps to keep others safe.

**Quarantine** if you are not up to date with COVID-19 vaccines or didn't have COVID-19 in the past 90 days. Stay home and away from other people for at least 5 days. If you are up to date or had COVID-19 in the past 90 days you

Avoid travel through day 10.

Wear a mask around other people for 10 days.

Watch for symptoms of COVID-19 for 10 days.

Up to date means a person has received all recommended COVID-19 vaccines, including any booster dose(s) when eligible.

To calculate the recommended

time frames, day 0 is the date you last had close contact to

someone with COVID-19.

If you can't wear a mask, stay home (quarantine)

people, and do not travel

and away from other

#### **Get Tested**

Get a COVID-19 test on or after **day 5** or if you have **symptoms**.

People who had COVID-19 in the past 90 days should only get tested if they develop symptoms.

You tested **negative**. You can leave your home.

Keep wearing a mask in public and when traveling through day 10.

You tested **positive** or have **symptoms**.

Do not travel for 10 days.

If you are unable to get tested, you can leave your home after day 5 if you have not had symptoms. Keep wearing a mask in public and avoid travel through day 10.

At all levels, people can wear a mask based on personal preference, informed by personal level of risk.
